

Site Contact and Escalation Directory

NU-OPS-007

Version: 1.0

Site scope: all_sites

Document ID: NU-OPS-007

Effective date: 2024-09-21

Status: current

Access scope: site_operations

Northstar Urgent Care Cooperative (NUCC)
Status: Current · **Version:** 1.0 **Issue date:** 15 September 2024 · **Effective date:** 21 September 2024 ·
Review date: 21 March 2025 **Scope:** All sites · **Access label:** site_operations

Fictional training material. Names, roles, and contact routes in this document are invented for a RAG test corpus. This directory covers administrative and facilities coordination only; it is not a clinical escalation directory.

This directory and its fictional role routes were approved by the Director of Operations on 15 September 2024 and are effective from 21 September 2024.

How to use this directory

Staff should start with the role responsible for the issue and use the listed shared mailbox for routine written routing; include the site, a short issue description, when it began, and the record or ticket identifier if one exists. Do not include unnecessary personal or sensitive information in a general operations message.

For a time-sensitive facilities or site interruption, notify the local site lead as well as the central role listed for that topic. The directory gives destinations, not a promise of response time or service restoration. If a route is unavailable, use the after-hours path below and record the attempted contact in the applicable issue record.

Central operations roles

Role	Use for	Fictional route
Director of Operations	Organization-wide operational decisions, document ownership questions, and continuity coordination	operations-director@northstar-uc.example.invalid
Facilities Coordinator	Facilities issue intake, routine supply routing, receiving discrepancies, and vendor coordination	facilities-desk@northstar-uc.example.invalid
People Operations Coordinator	Administrative schedule-change process questions	people-operations@northstar-uc.example.invalid
Records Coordinator	Administrative records handling or a suspected records misdelivery	records-desk@northstar-uc.example.invalid
Quality and Continuity Analyst	Workplace incident reporting process, operational metrics, and continuity follow-up	quality-continuity@northstar-uc.example.invalid

Role	Use for	Fictional route
Operations Desk Coordinator	Directory corrections, general operations routing, and recording unresolved desk questions	<code>operations-desk@northstar-uc.example.invalid</code>

The shared mailbox names above are fictional routing labels. This directory does not identify individual inbox access, backup coverage, or a response-time commitment.

Site lead roles

Contact the site lead for local coordination, handoff status, and site-specific records. If the site lead is unavailable, use the central operations route for the issue type; the directory does not establish a named deputy for any site.

Site	Role	Fictional route
Harbor Point	Harbor Point Site Lead	<code>harbor-point-lead@northstar-uc.example.invalid</code>
Alder Creek	Alder Creek Site Lead (role mailbox; no named incumbent in the staff registry)	<code>alder-creek-lead@northstar-uc.example.invalid</code>
Northgate	Northgate Site Lead	<code>northgate-lead@northstar-uc.example.invalid</code>

The Alder Creek route is a fictional role mailbox for corpus testing. It does not identify a registered employee or establish who currently holds that role.

Topic routing

Topic	Primary route	Include or record
Facilities issue	Facilities Coordinator; copy the local site lead for a time-sensitive site impact	Site, location within site, observed condition, start time if known, priority basis, and issue record ID
Routine supply request or receiving discrepancy	Facilities Coordinator; local site lead retains the site receiving record	Item or shipment reference, quantity involved, date received or needed, and discrepancy record ID
Schedule-change request or process question	People Operations Coordinator; site lead handles local handoff	Requested date or shift, approval status (requested, approved, or declined), and record location; do not treat a request as approval
Administrative records misdelivery	Records Coordinator	Route through the designated records channel; limit details in general email and follow the records procedure
Workplace incident report	Quality and Continuity Analyst; notify the site lead for local coordination	Incident record ID, site, date/time, and immediate non-clinical coordination status; use the incident procedure for required details
Service interruption	Director of Operations for coordination, with the local site lead; Facilities Coordinator when facilities are involved	Affected site or function, observed status, time last confirmed, actions taken, and next update owner

Topic	Primary route	Include or record
Directory correction or unresolved routing question	Operations Desk Coordinator	Role or route in question, source document if known, and whether a follow-up owner has been assigned

The applicable procedure controls what information must be recorded and who approves an action. This directory does not grant approval authority.

After-hours escalation path

For a non-clinical operational issue discovered outside the local team's normal handoff, send the summary to `operations-desk@northstar-uc.example.invalid` and the relevant central route above. Include the site lead route when a site needs local coordination. Record the time and destination used in the relevant issue log. The Operations Desk Coordinator records an unresolved routing question and assigns a follow-up owner when one is known.

This directory does not define an emergency response number, on-call roster, guaranteed monitoring hours, clinical escalation route, or a service-level commitment. If a needed destination is not listed here or in the relevant current procedure, do not infer or invent one; record the gap and ask the Operations Desk Coordinator to confirm it.

Directory owner and updates

The Operations Desk Coordinator maintains this directory. Send proposed corrections to `operations-desk@northstar-uc.example.invalid`. The listed routes remain fictional test data; a correction request does not change a controlled procedure or its approval rules.
