

Quality Huddle Notes, September

NU-OPS-012

Document ID: NU-OPS-012

Status: current

Version: 1.0

Effective date: 2024-09-30

Access scope: operations_leads

Site scope: organization_wide

NU-OPS-012 · Final working record

Northstar Urgent Care Cooperative · All sites

Meeting date: 2024-09-30 · Access scope: operations_leads

Fictional educational test material. These notes are an administrative working record. They contain no patient details and do not establish clinical or care guidance.

Meeting context

Date: 2024-09-30

Format: Cross-site operations huddle

Facilitator and notes owner: Harbor Point Site Lead

Attendees by role: Director of Operations; Harbor Point Site Lead; Records Coordinator; Quality and Continuity Analyst; Operations Desk Coordinator; Northgate Site Lead.

The group reviewed draft administrative materials for continuity, role routing, and future quality reporting. The huddle did not approve or amend a policy, procedure, access rule, or metric definition. The three access labels in this document follow NU-OPS-010; this record is limited to the employees eligible for operations_leads there.

Completed during this huddle

- As recorded on 2024-09-30, the group reviewed the proposed monthly measure names in NU-OPS-019 and confirmed that its draft contained definitions only, with no underlying records or numerical totals. **No September metric result was reported or inferred.** NU-OPS-019 was a draft at the time of the huddle; the huddle did not approve or amend it. NU-OPS-019 was separately approved and effective on 2024-10-01.
- The Operations Desk Coordinator entered the question about an Alder Creek Site Lead backup into NU-OPS-020 as **open**. The directory does not name a deputy, and the huddle did not establish one.
- The group recorded that the service interruption update under NU-OPS-006, a linked facilities issue record under NU-OPS-003, and a workplace incident record under NU-OPS-011 have separate purposes. No specific event record or site incident was reviewed at this huddle.

“Completed” means the stated huddle action was completed; it does not mean the underlying policy or question was resolved.

Open follow-ups

Follow-up	Owner role	Status	Due / next check
Ask the relevant site and central operations owners whether an Alder Creek Site Lead backup role has been established; update NU-OPS-020 only when a source confirms the answer.	Operations Desk Coordinator	Open; no backup named in the available directory or this record.	No due date established; review at the next huddle.
Check whether source records and date fields are available before any monthly operations metric count is prepared. Do not submit an estimated or assumed value.	Quality and Continuity Analyst	Open; no source dataset or September totals were presented.	Check by 2024-10-14.
Confirm whether any site has a local handoff-record location and retention period that should be added to the opening/closing checklist. Record “not established” if no approved source is found.	Harbor Point Site Lead, coordinating cross-site follow-up	Open; this huddle did not confirm the locations or retention periods for all sites.	Check by 2024-10-14.

An owner assignment is not evidence that the follow-up is complete. Record the supporting source and completion date when an item is closed. The second and third follow-ups are assignments from this huddle, not organization-wide requirements.

Deferred items

- **Monthly targets or comparisons by site:** deferred at the huddle. As of 2024-09-30, NU-OPS-019 defined proposed record counts only; it provided no denominator, target, or site performance result. No target or comparison was adopted.
- **A named Alder Creek backup:** deferred pending confirmation from an authoritative role-based source. Until confirmed, do not infer or publish a person or deputy role.
- **A single retention period for site handoff records:** deferred because no approved cross-site period was established in the materials reviewed.

Deferred means no decision was made at this huddle. It does not create an interim rule.

Unresolved service-desk question

Question: Who, if anyone, is the designated backup for the Alder Creek Site Lead when the site lead is unavailable outside the normal handoff?

Status: Unresolved. NU-OPS-007 identifies an Alder Creek Site Lead role mailbox but does not identify a named incumbent or deputy. These notes do not establish a backup.

Follow-up owner: Operations Desk Coordinator.

Record: NU-OPS-020, open entry; no answer or supporting source recorded.

Next check: At the next huddle, proposed for 2024-10-14; no response deadline is established.

Do not use the role mailbox’s existence as evidence that a deputy or after-hours coverage arrangement exists. If the question is asked before confirmation, state that the corpus does not establish the backup.

Next review

Next huddle under consideration: 2024-10-14. The date is a planning assumption, not a confirmed meeting invitation. The Harbor Point Site Lead maintains these notes and will update each item only when its status and supporting source are known.

Revision record

Version	Issued	Effective	Change	Approval
1.0	2024-09-30	2024-09-30	September cross-site operations huddle notes	Operations Desk Coordinator; finalized 2024-09-30 as a meeting record; no policy approval implied

Owner: Harbor Point Site Lead, Northstar Urgent Care Cooperative.
